

Job Profile

JOB TITLE: Mechanic	DIVISION: Thunder Creek Gas Services, LLC
DEPARTMENT: Operations	SUPERVISOR:
DATE REVISED: August 1, 2017	SUPERVISOR'S TITLE: Maintenance Foreman
HR REP:	WORK LOCATION: Douglas, WY

This profile does not create an employment contract, implied or otherwise, other than an "at will" employment relationship. Nothing in this profile restricts management's right to assign or reassign job-related duties/functions.

BASIC ACCOUNTABILITY (Briefly describe the purpose and scope of the job).

The position requires working within a team environment to help maintain and operate rotating and other equipment in a safe, effective, efficient and environmentally sound manner. Routine assignments include completion of regular maintenance and repairs of Natural Gas engines and compressors. Assisting fellow mechanics with scheduled engine and compressor overhauls. Assisting and overseeing contractors employed by the company to complete assigned tasks or projects. Monitoring and scheduling of both predictive and preventive maintenance tasks to ensure equipment reliability. Anticipating unscheduled maintenance needs through monitoring and review of equipment operating parameters. Provides leadership and teaching opportunities to less experienced personnel. Treats colleagues, supervisors, management and customers in a professional, positive, and helpful manner.
